REFILCON FILTERS (P) LTD.

HYDRAULIC FILTER ELEMENTS

www.refilconfilters.com

WHO WE ARE

Reflicon Filters is an industrial filtration manufacturer specializing in hydraulic and lubrication oil filter cartridges. We have been supplying the Indian market with our quality products since 1993.

MANUFACTURING STANDARDS

At **REFILCON** we pride ourselves on the quality of each and every filter that we make. We follow strict guidelines as set out in our Quality Management System to ensure all filters we manufacture and ship to our customers meet only the highest standards.

ENGINEERING DESIGN

At Reflicon Filters we are experts in filtration. Our engineering team has over 20 years of combined experience in the design and implementation of new filtration products. We design new filtration products based on our customer needs as well as reverse engineer quality filter replacements for all of the popular hydraulic filter brands.

QUALITY REPLACEMENT ELEMENTS

REFILCON uses only quality raw materials that are equivalent to the original manufacturers specifications. Our replacement elements have been designed to meet and/or exceed the OEM parts.

All raw material goods are inspected by our Quality Department to ensure only the best components are used to assemble our parts

COMPETITIVE PRICING

Before we go to market with our products, **REFILCON** researches market trends to ensure we are one of the most competitively priced brands available.

INDUSTRY BEST LEAD TIMES

REFILCON has a 4-5 business day lead time to manufacture from stocked raw materials, after receipt of order. In many cases we can ship in 24-48 hours for rush orders at no extra cost.

Reflicon Filters also making stocks of a large number of high volume movers ready to ship the same day. We can work with you to ensure that your parts are in stock and ready to ship when you need them.

HYDRAULIC & LUBE OIL FILTERS

Reflicon Filters manufactures hydraulic & lubrication oil filters for the following ;

- Low Pressure Filters Elements (from 145 up to 435 psi)
- Medium Pressure Filters Elements (from 1000 to 1500 psi)
- High Pressure Filters Elements (from 3045 psi to 4800 psi)
- Return Line Filters Elements (from 40 psi to 435 psi)
- Suction Line Filters Elements (from 40 psi to 100 psi)

MEDIA GRADES
